Procurement Engineer

août 2023 - janvier 2026 (2 ans 6 mois)

Émirats arabes unis

Manage RFQs, supplier negotiations, and contract agreements, with a focus on valves for ADNOC projects.

- Conduct manual comparative price analysis to ensure cost-effective procurement.
- Expedite manufacturing processes, track milestones, and resolve technical issues with engineering teams.
- Facilitate vendor meetings and collaborate with ADNOC to maintain project timelines and quality standards.
- Work closely with the commercial team to optimize procurement strategies and align with project goals.

Junior Engineer

juin 2022 - août 2023 (1 an 3 mois)

Doubaï, Émirats arabes unis

From June 2022 to August 2022, I received training in the BAB 485 Sustainable Facilities Project, gaining experience in sustainable project management practices. Following this, I worked on the ASAB Phase II project, focusing on expediting tasks within the procurement department. My responsibilities included managing order progress, coordinating with suppliers, monitoring manufacturing milestones, and collaborating with internal teams to resolve technical and commercial issues efficiently.
