Niyas C K

Procurement Engineer at Abu Dhabi Ports Group | Marine Technical Co-ordinator

Abu Dhabi Emirate, United Arab Emirates

Summary

Visionary professional with a profound passion for the maritime industry, leveraging my extensive experience as a Technical Coordinator and my current role as a Procurement Engineer to chart new courses of success. As a Procurement Engineer, I am committed to optimize and manage the procurement process by ensuring timely and cost effective sourcing and delivery of spares, general stores, provisions, bond orders etc. to Oil Tankers, Bulk Carriers and Offshore support vessels across different ports in India, UAE, Egypt, Oman, KSA, Turkey, China, Singapore, Netherlands, Greece, South Korea etc. As a Technical Co-Ordinator I have provided unwavering support for the maintenance, repair, class survey, ADNOC vetting and dry-docking operations of fleet vessels including Bulk carriers, Landing crafts, Tug boats, Crew boats and AHTs.

Key Expertise:

- # Marine Procurement & Supply Chain Management – Managing the procurement of spares, stores, lubricants, and provisions while ensuring timely delivery at ports.
- # Vendor & Supplier Negotiations – Building strong relationships with vendors and negotiating the best pricing and terms for cost-effective procurement.
- # Technical Coordination – Assisting technical superintendents in arranging 3rd-party service teams for vessel repairs, dry docking, and maintenance.
- # Inventory & Cost Optimization – Tracking landed spares, evaluating reusability, and minimizing procurement costs through strategic planning.
- # Contract Management & Compliance – Ensuring procurement operations align with company policies, budget constraints, and regulatory standards.
- # Stakeholder Collaboration – Working closely with vessel crew, technical teams, and suppliers to meet operational demands.

I am always open to new opportunities, collaborations, and discussions related to marine procurement, supply chain efficiency, and vendor management. Feel free to connect and reach out! ##

Experience

OFCO - Offshore International

Procurement Engineer

February 2025 - Present (1 year 4 months)

Abu Dhabi Emirate, United Arab Emirates

Vessels: OSVs, Tugboats, Landing Crafts and AHTs

ERP: Sage X3 | Microsoft Dynamics

- Managing the procurement of spare parts, lubricants, consumables, deck and engine supplies for fleet vessels to ensure smooth operations.
- Managing logistics and customs clearance for international shipments through third parties.
- Handling urgent and emergency procurement to support vessels during breakdowns and dry docking.
- Arranging third-party service teams for onboard repairs, maintenance, and inspection jobs.
- Ensuring compliance with company procurement policies and industry standards to maintain efficiency and transparency.

Unique Tanker Ship Management L.L.C

Procurement Engineer

July 2023 - February 2025 (1 year 8 months)

Dubai, United Arab Emirates

Vessels: Crude Oil and Product Tankers

ERP: Digital Ship Manager by Vollzo

- Identify and evaluate suppliers who provide spare parts, equipment and services essential for efficient operation of tanker vessels and ensured that all procured items meet marine industry standards and regulations.

- Coordinate the logistics and delivery of goods with port agents to ensure timely arrival at different ports across the world to avoid demurrage costs.
- I have successfully managed the procurement aspects of taking over new vessels at Korea, Rotterdam and UAE, ensuring all necessary spares, stores, communication equipment, chemicals, and other supplies are delivered on time and secured contracts for AVCS, gas cylinders, V sat and communication prior to take over.
- Successfully completed dry docking operations in China, UAE and Oman ensuring timely delivery of spares and necessary supplies.
- Conducted an inventory of landed items at Fujairah Port Bays from vessels transferred to other management or scrapped. Compiled a detailed list and labeled these spares and equipment for potential reuse in other vessels.

KHALID FARAJ SHIPPING

Technical Coordinator

March 2022 - July 2023 (1 year 5 months)

Abu Dhabi, United Arab Emirates

Vessels: Bulk Carriers, Landing Crafts, AHTs, Tugboats and Crew Boats

ERP: E-Vitalyst by Teksalah

- Arrange repairs, requisitions for service engineers /technicians for a diverse fleet of vessels including Bulk Carriers, Landing Crafts, Tug Boats, AHTs, Crew Boats etc.
- Assisted Technical super intendent during Dry dock of fleet vessels by ensuring attendance of essential personnel, including class surveyors, coating supervisors, technicians, and service engineers. Collaborated closely with the procurement department to guarantee the timely delivery of spares and the landing of machinery for repairs.
- Secured plan approvals from classification societies for modifications on board, including converting tanks to sewage holding tanks to comply with regulations, installing Ballast Water Treatment Systems (BWTS) units, Shaft Power Limiters, and obtaining approvals for EEXI and SEEMP III plans.

- Ensure that class surveys including annual surveys, UWILD surveys and hull renewal surveys are taking place on time. (Bureau Veritas-BV, Class NK, Lloyd's Register- LR, Tasneef).
- Annual reporting of IMO DCS to Recognized organization and EU MRV emission report to accredited verifiers to comply with regulations.
- Reviewing and monitoring vessel specific Preventive Maintenance System (PMS) and ensuring timely maintenance of vessels including Engine overhaul, afloat repairs, dry dock for which timely supply of spares and manpower is ensured.
- Prepare annual objectives and targets for technical department which includes survey monitoring log, lube oil analysis, coolant analysis, underwater inspection plan etc.
- Led a team of in-house engineers and technicians, overseeing their deployment for vessel maintenance and repairs in alignment with Technical Superintendents' instructions, ensuring efficient and timely execution of all assigned tasks.
