

Devika Rajan

Procurement Engineer

Summary

As an Electrical Engineer currently working as a Procurement Engineer at Aries Marine & Engineering Services, I support sourcing and coordination of electrical, mechanical, and marine equipment while ensuring technical and commercial requirements are met. Previously, I worked as a Maintenance Administrator at Poundstretcher (UK), supporting facilities and engineering teams across 300+ retail stores. That role gave me strong exposure to maintenance operations, contractor coordination, compliance documentation, and cost tracking. With a Master's in Advanced Electrical & Electronics Engineering with Management, I enjoy roles that sit at the intersection of engineering, procurement, and project coordination. I'm motivated by problem-solving, collaboration, and keeping operations running efficiently.

Experience
